

Neotech Institute of Pharmacy

"Genetics in Medicine: The Pharmacogenomic Approach to Personalized Treatment"

Date: 24th January 2025

On January 24th, 2025, the Neotech Institute of Pharmacy hosted a guest lecture on "Genetics in Medicine: The Pharmacogenomic Approach to Personalized Treatment" by Miss Bhavna Chandnani, a distinguished scholar with an ongoing PhD, brought a wealth of knowledge to the lecture hall, captivating students with profound insights into the intricacies of Genomics. The lecture provided students with in-depth knowledge of the subject matter. Her creatively incorporated fun activities into the session, engaging students with games related to general knowledge and reasoning. The session fostered active participation, with students enthusiastically responding to questions and challenges.

Overall, the guest lecture successfully combined educational content with interactive elements, not only disseminated knowledge but also inspired a passion for learning, marking it as a standout event in the academic calendar of the institute.
